Participate in a Research Study

The Contributing Factors and Effects of Breastfeeding Position-Related Pain in Postpartum Women: A Mixed-Methods Study.

This study will examine breastfeeding mothers' experience of body pain or discomfort while breastfeeding. You are eligible to participate if you have worked with breastfeeding mothers for at least 2 years, currently live in the US, are, and are over 18 years of age. The purpose of this research is to better understand pain or discomfort mothers may experience related to breastfeeding. [Learn more and complete the survey](#).

Empowerment Network Sponsor

"The mission at Intimate Rose is to advance pelvic health worldwide. Intimate Rose combines best-in-class pelvic health devices with detailed educational materials for patients and clinicians. Intimate Rose is committed to furthering evidence-based practice by funding the **Academy of Pelvic Health's research grant (\$10,000)**, thereby expanding clinician knowledge for optimal patient outcomes. "
